Maximising Impact: Capitalisation and Policy Reach for Interreg

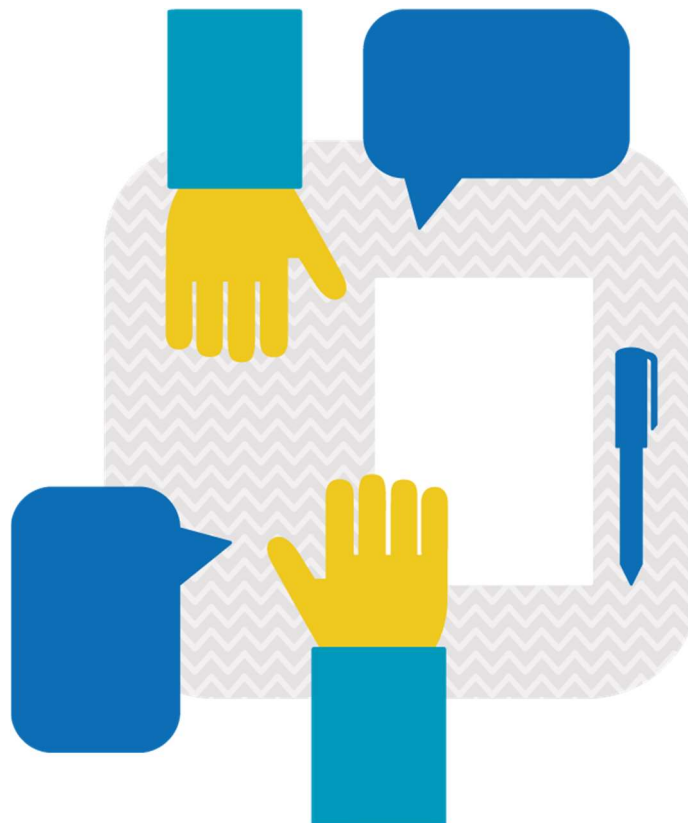

23-24 October 2024

Paris

Outline

The first projects of 2021-2027 are starting. Local and regional authorities are taking the centre stage. The newly elected EU Parliament has started working and the new Commission will soon be in place. Programmes are now actively considering capitalisation approaches by organising specific calls or thinking about the project result transfer to policy level. It is all getting aligned, and now it is "just" about making it happen.

Objectives

Having an impact on the territory and at policy level are of great relevance for Interreg project results, and that could now well be within reach. During this event, programmes will explore and discuss about the main challenges and practices of result transfer, policy level outreach within the thematic EU policy framework. This will also provide a summary on all the capitalisation support provided and available by Interact, and looking together into the future of capitalisation.
