

Annex no. 2 of tender documents - Tender Evaluation Criteria and Rules for their Application

1. The only criterion for the evaluation of tenders is: **Total price for the entire subject of the contract in EUR, including VAT**.
2. The bidder shall enter the price in the attached form "**Proposal for fulfilling the criterion**".
3. If the tenderer is a payer of value added tax (hereinafter referred to as "VAT"), the proposed contract price shall include:
 - the proposed contract price stated in EUR without VAT,
 - percentage rate and amount of VAT,
 - the total proposed contract price in EUR including VAT
4. If the tenderer is not a VAT payer, he shall state the total proposed contract price. He will point out the fact that he is not a VAT payer in the tender.
5. In the event that, in accordance with the legal order of the Slovak Republic, the tenderer in the position of contractor will not be obliged to remit VAT on the delivery of the subject of the contract, but the contracting authority in the position of customer will be obliged to pay it, the tenderer shall indicate the price including VAT in the tender, which the contracting authority will be obliged to pay.
6. If a tenderer who is not a VAT payer becomes a successful tenderer and becomes a VAT payer before concluding the contract with the contracting authority, the total price given in the tender shall become the price including VAT.
7. In the event that the tenderer is not a VAT payer on the date of submission of the tender, but becomes VAT payer after the conclusion of the contract, he is not entitled to an increase in the total price of the subject of the contract, i.e. in the event of a change in the tenderer's status as a VAT payer, the total prices submitted by him are final and immutable and will be considered as prices with VAT.
8. The price, which will be the contract price, must include all expenses/costs of the tenderer related to the implementation of the subject of the contract according to the requirements stated in these tender documents and in the Evaluation Contract and its annexes.
9. Before submitting the tender, the tenderer is obliged to take into account everything that is necessary for the full and proper performance of the Evaluation Contract, while including all costs associated with the performance of the contract into the final price.
10. The successful tenderer will be the tenderer with the lowest proposal for fulfilling the criterion, i.e. the lowest price for the entire subject of the contract in EUR, including VAT, who simultaneously meets the requirements for the subject of the contract and the terms and conditions for participation set by the contracting authority.
11. In case of equality of the lowest "Total price for the entire subject of the contract" in EUR including VAT, the order is decided by the order indicated in the minutes from the opening of tenders, i.e. order generated automatically by the IS EVO system.

Notice:

The contracting authority decided to use the "on-line" functionality of making offers available in the IS EVO system , i.e. automatic creation and sending of minutes from the opening of the tenders to all members of the commission and tenderers who submitted the tender by the deadline for opening of the tenders at the time specified in the public procurement notice and in the tender documents, in accordance with the Public Procurement Act. The contracting authority has set structured criteria in connection with the "on-line" availability of tenders, the tenderer must fill them in the IS EVO system when submitting the tender.
