Keep.eu: API & more

28 January 2025

Online

Outline

Interact has created the keep.eu API, which is available to everyone and provides access to the extensive data contained within keep.eu. Your website and other platforms can greatly benefit from this resource. But do you know what an API is? More importantly, do you know how to make the most of keep.eu's API?

If you're unfamiliar with APIs, this webinar is the perfect opportunity to catch up. In just one session, you will learn what an API is and how to leverage keep.eu's API to its fullest potential.

If you are already familiar with APIs but have not yet explored keep.eu's, this webinar will demonstrate how it can enhance your work. You will discover how the API can improve your programme's understanding of its context or inspire innovative applications you may not have anticipated. Should you develop a unique use case following the discussion, we would be delighted to hear about it and may even feature it in a future webinar.

In addition to exploring the API, the webinar will include updates from both keep.eu and Interact, highlighting key news and upcoming features that could benefit you and your programme.

Objectives

By the end of this webinar, participants will:

- Have a clear understanding of the potential of keep.eu's API.
- Gain insights into upcoming developments and new features from keep.eu and Interact.

Keep.eu: API & more

28 January 2025

Online

Single day

Tuesday, 28 January 2025

(all hours are CET – Central European Time)
