

# Effective approaches **to** **assessing** project quality

Besiana Ninka, Daniela Minichberger, Rosa Escamilla, Lamprini Tsoli,  
Monika Balode | Interact | 12.03.2025

**Interact**

**Co-funded by  
the European Union**  
Interreg

# Objectives

- **Sharing experiences** with various project assessment approaches, discussing practices, challenges and how have you addressed them;
- **Mutual learning**, benefiting from each other's experiences and ideas.
- **Get engaged**, ask questions, share your thoughts, and express any concerns.

# Agenda

**01**

**Setting the scene: reflection on project quality assessment**

**02**

**Experience sharing in strategic assessment**

**03**

**Experience sharing in strategic assessment and in operational assessment**

**04**

**The potential role of AI in project assessment**

**05**

**Effective promotion: Reaching the right applicants**

# Setting the scene

## Reflection on quality assessment

The quality assessment of project applications is one of the key pillars in project selection!

# Quality assessment

Variety of approaches across Interreg programmes

Strategic and  
operational criteria  
– weight of those

Per criterion –  
heading plus sub-  
questions

Scoring or scoring  
plus written  
justification

Use of KO criteria  
or use of minimum  
thresholds

Practical issues

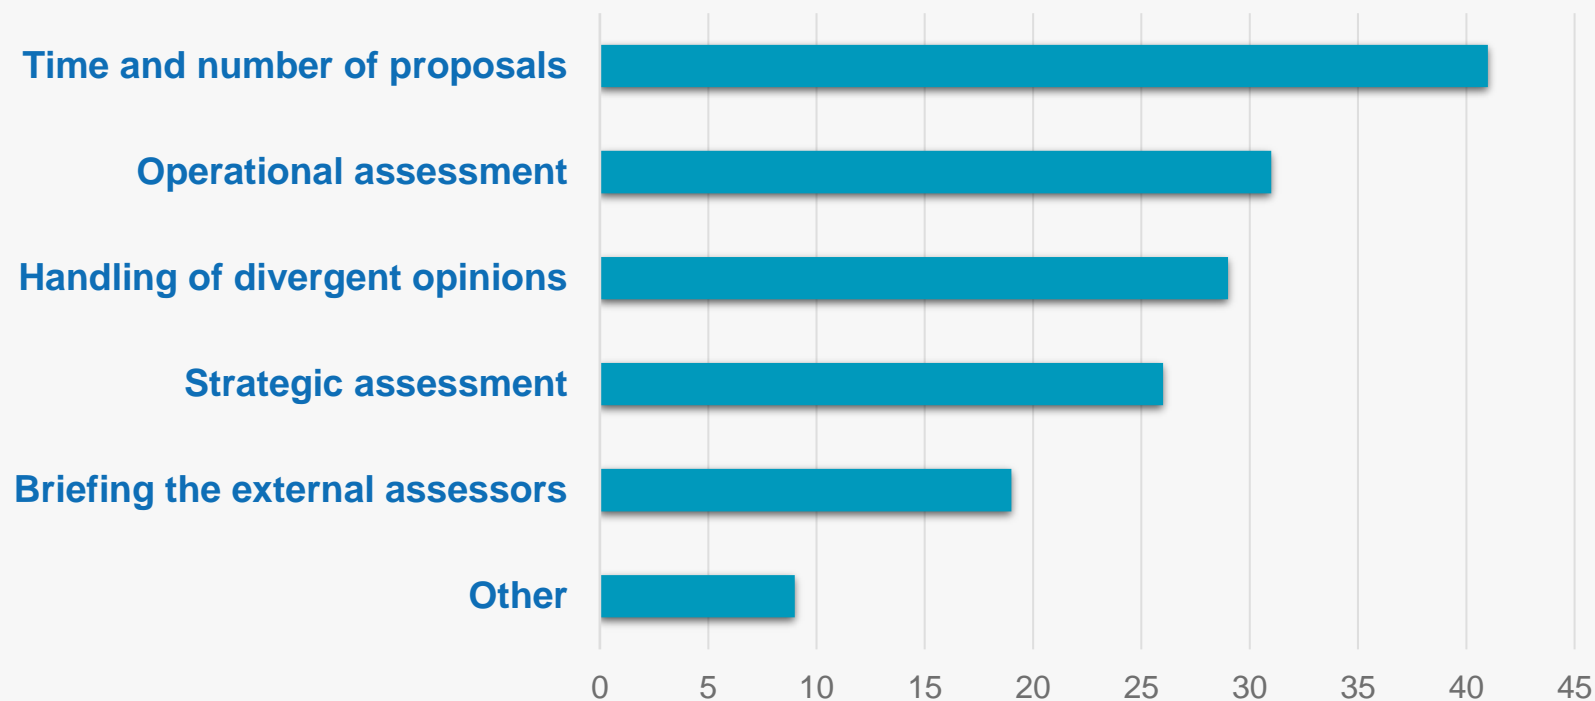

Internal and/or  
external assessors

One approach for  
all SOs or different  
sub-questions  
according to SO

Presentation of  
total scores or  
assessment  
profiles along  
criteria

## Your feedback from the registration

What are your main challenges during the  
assessment?

# Your feedback from the registration

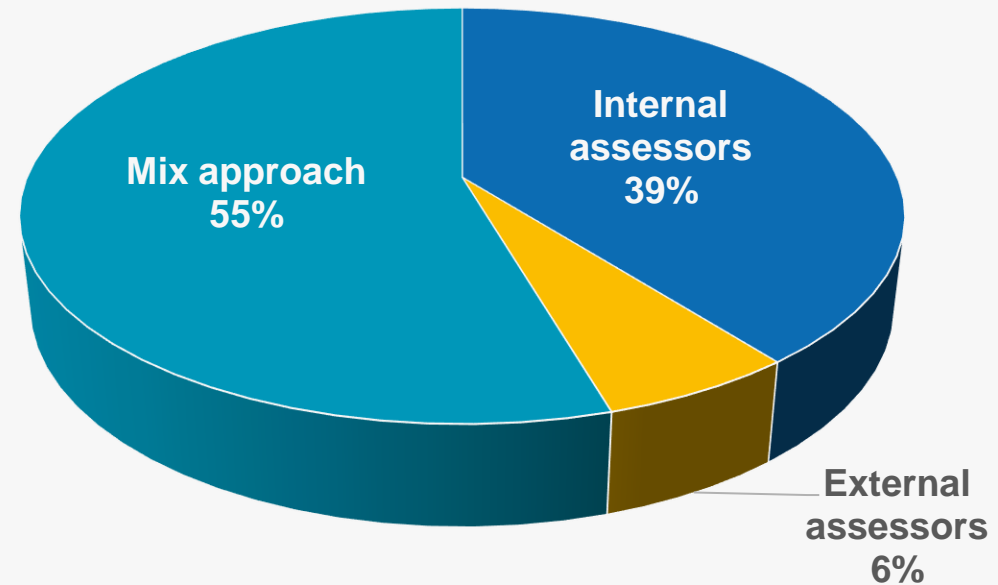

- Achieving complete balance between the requirements of AF and the selection criteria, including assessment of the strategic character of the long term results.
- Investment documentation when it comes to assessing investment projects.
- External assessor not acting professionally.
- Financial assessment.
- Assessing sustainability.
- To develop the most appropriate quality assessment grid.
- Measuring indicators - result and paired indicators.
- How to objectify the evaluation of criteria that are necessarily subjective depending on the analysis of the evaluator; "four eyes" principle.
- Finding a fair and balanced way to rank proposals that serve different sectoral priorities, programme objectives, and territorial development needs while ensuring strategic coherence. The geographical aspect is a crucial additional dimension, especially in the cross-border context.

## What are your main challenges during the assessment?

## Your feedback from the registration

Will you/have you assessed the project proposals  
using internal assessors, external assessors, or  
mixed approach?

# Common difficulties

The assessment process in Interreg programmes faces several key challenges, including:

## **Bias**

Biased view of internal/external assessor(s)

## **Weight**

Weight of the assessment in the for decision-making

## **Coherence, consistency**

Ensuring a coherent and consistent approach across all the assessments

## **Time**

Large numbers of applications lead to a considerable time pressure

## **Budget constraints**

Balancing cost and complexity

## **Commitment ownership**

Assessment focus more on compliance than on providing qualitative insights

# Mitigation measures

To address these challenges, Interreg programmes can implement several mitigation measures, for example:

## **Bias**

Procedures should allow for several perspectives if needed

## **Weight**

An informed decision based on transparent procedures & documents

## **Coherence, consistency**

Quality management

## **Time**

Sufficient time; use of options to make procedures efficient

## **Budget**

No complete assessments in case of K.O

## ... some other challenging criteria & aspects...

### Tricky points

Some assessment criteria are rather a routine whereas other criteria pose challenges

### Value for money

The overarching verdict on project quality! A comprehensive view based on outputs and results.

### Infrastructure

Assessing technical quality, maturity and climate resilience might pose challenges since it requires engineering expertise

### Partner capacity

Preference for safe partners often leads to preferential treatment of public institutions and/or those with previous experience

# Some considerations...

## JS assessment Value added

It may help **levelling out inconsistencies** in the use of arguments and scoring.

It is the **only way to spot synergies between projects** – looking at project clusters from a more comprehensive perspective could also be an important point in project assessment, e.g. when it comes to integrated place-based development.

## On justifications

The justification should highlight the most **relevant strengths and weaknesses** with a view to the overarching criterion and the concrete subquestion(s) (guiding principles).

## On conditions

Clear rules on conditions to ensure fair and equal treatment.

# Your feedback from the registration form: Fine-tuning the assessment process for future calls

## **Revised assessment criteria:**

- Adjust based on lessons learned from past assessments.
- Focus on clearer, more coherent scoring aligned with programme objectives.

## **Simplification of Process:**

- Streamline grids, questions, and criteria.
- Shorten lists of questions for efficiency.

## **Increased involvement of sectoral and territorial experts:**

- Strengthen participation in call development and assessment.

## **Enhanced consensus-building:**

- Improve mechanisms to ensure balanced final rankings and consistency within the process.

# ... and some **key takeaways...**

**Interreg programmes are cooperation programmes!**

Cooperation character & and partnership relevance are their key pillars!

Interreg programmes are meant to trigger longer-term cooperation: the results of cooperation should be sustainable and durable!

The point of reference during assessment is what is stated in written in the application form.

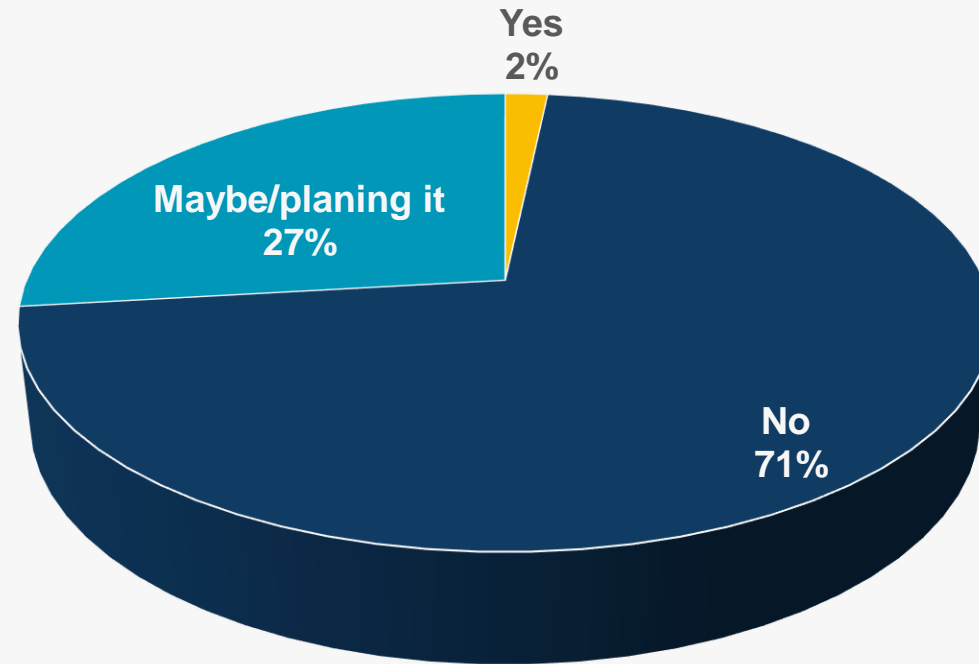

# The potential role of AI in project assessment

## Your feedback from the registration

Are you using any AI tools to support the  
assessment process?

# Floor is open for discussion

- In which stage of the assessment process can AI support the programmes?
- What are the risks of relying entirely or partially on AI during the assessment process?
- What are the key ethical considerations to keep in mind?

# Effective promotion: Experience sharing

*Dana Kaščáková, Interreg CENTRAL EUROPE  
programme*

# Your feedback from the registration

## Have you used or will you use any innovative approaches in promotion activities?

- ✓ Maybe/Not yet.
- ✓ It is unclear which promotion the question refers to
- ✓ We haven't yet but I strongly hope we will start soon / We are planning to use innovative approaches
- ✓ No, but I am interested to get an overview of possible innovative approaches / is excited to hear from others innovative approaches used
- ✓ Yes, and we will
- ✓ We do a lot proactive activities.
- ✓ Not innovative as such, however we gradually tweak the programme communication and outreach activities
- ✓ We are using website, social media, national contact points
- ✓ Promotion activities of the call for proposals? We have used Facebook promotion, but a lot of promotion has
- ✓ happen with a help of word of mouth. We have also attended events organised by the stakeholders,
- ✓ as well as have organised events for specific priorities. Don't know how innovative is that.
- ✓ Yes, we aim to place more weight on social media promotion and leverage AI tools to enhance outreach, engagement, and effectiveness.
- ✓ We are always trying to improve our processes with different kind of initiatives short movies with the results of the projects
- ✓ Performing informative workshops (emphasis was made on the mistakes made in previous Calls) and published video of the workshop at the program's website, performing meetings with rejected projects in previous deadlines and explaining the assessment score, promoting the open deadline at different events

Be part of it!

# Leveraging digital platforms for wider reach

# Target Audience Archetypes

## The Policy maker

### Represents (examples)

- Local, regional & national policy makers
- Committee of the Regions
- EU Parliament members

## The Decision maker

### Represents (examples)

- Ministries, national agencies, civil servants etc.
- Regional & national authorities

## The Potential applicant

### Represents (examples)

- Regions
- Business support organisations
- Trade/industry associations
- Universities / Knowledge institutions
- Municipalities (Local authorities)
- NGOs

## The Beneficiary

### Represents (examples)

- Regions
- Business support organisations
- Trade/industry associations
- Universities / Knowledge institutions
- Municipalities (Local authorities)
- NGOs

## Staff working in Programme Joint Secretariats

### Represents (examples)

- Joint Technical Secretariat
- Communication Managers
- Communication Officers
- Head of Joint Secretariat

# Archetype | The Potential Applicant

Represents: Regions, Business support organisations, Associations, Universities / Knowledge institutions, Local authorities, NGOs, etc.

## Key needs

- Understand what Interreg is, what programmes exist and how to apply
- Easily understand the application process, how to find potential partners, who to contact and how to monitor upcoming calls
- Know programme priorities, what issues are solved in his area and what have projects achieved to be inspired to apply

## Pull factors

- Easy-to-understand information to quickly gain overview of Interreg and the programmes
- Clear guidelines and visuals explaining the application process
- Access to a joint and up-to-date database of relevant open calls
- Enough information to understand the basics of Interreg

## Push factors

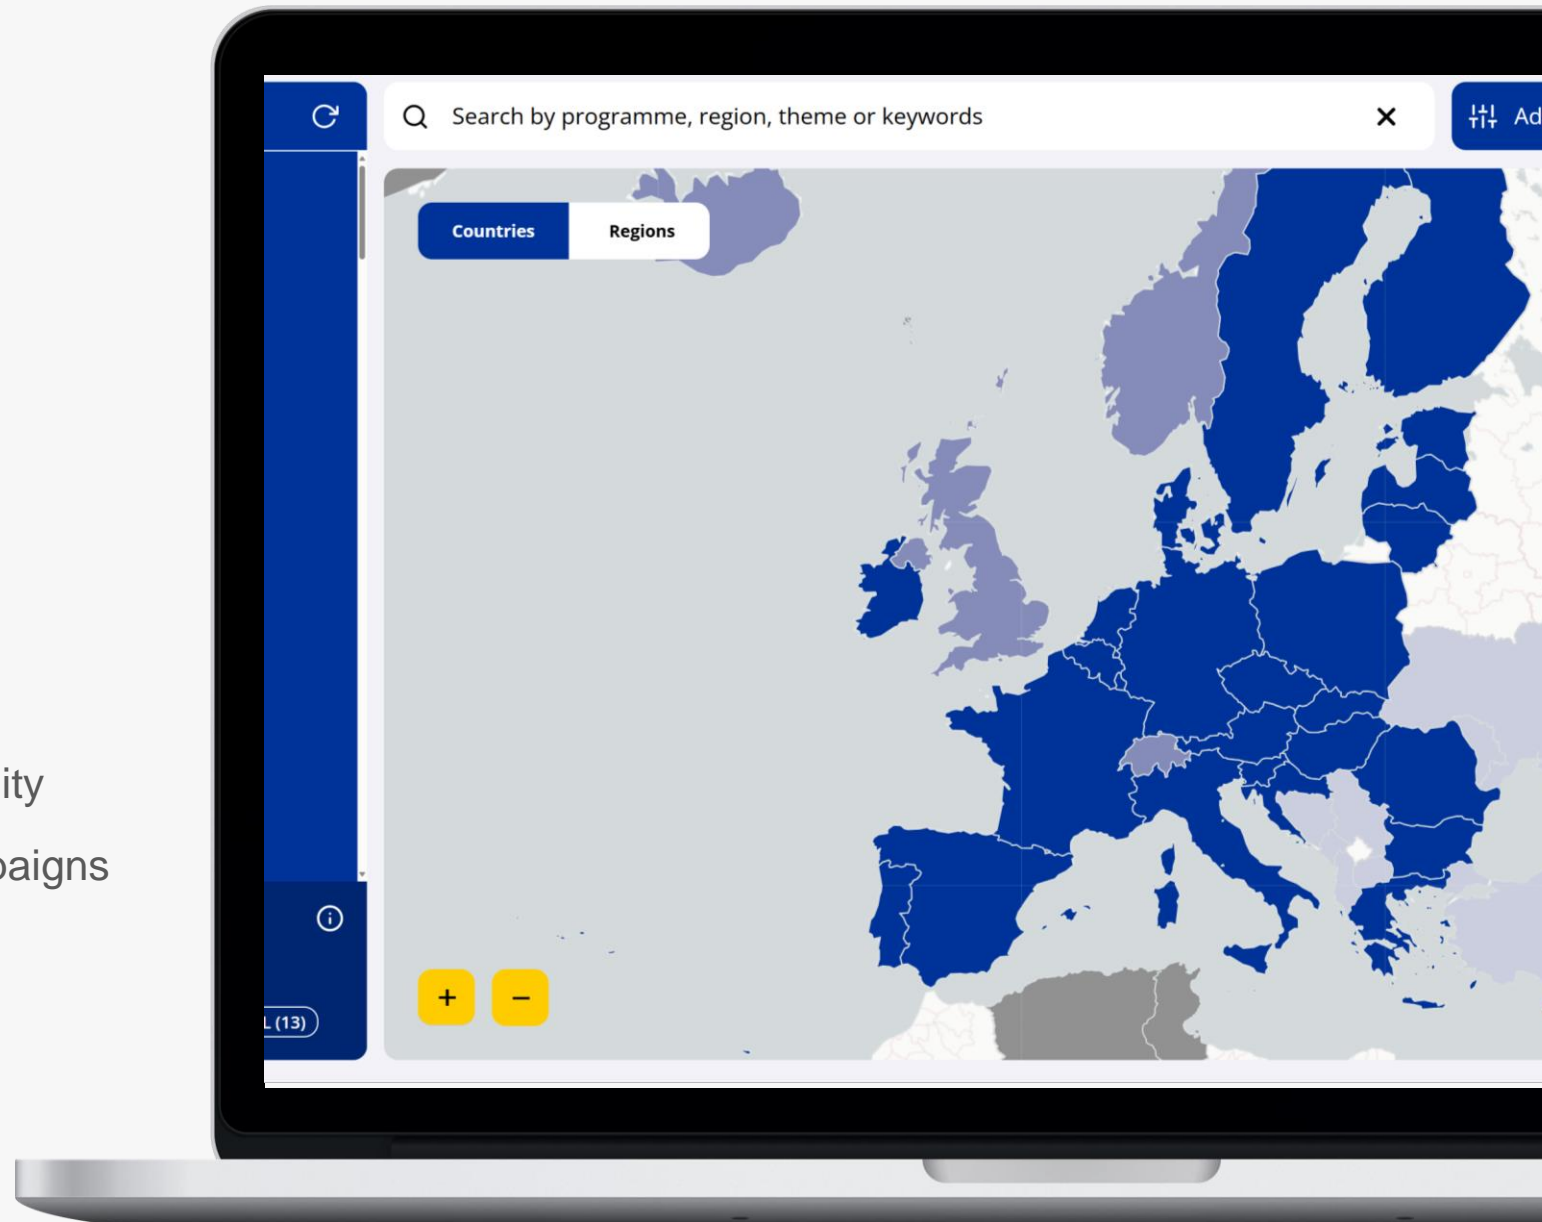

- Information that is conveyed in a too technical language and is difficult to access
- Too detailed and complex information about the application process and funding

# Interreg.eu website

Managed by Interact and fueled by the **collaborative work of all Interreg programmes**, our channels serve as:

- The voice of the entire Interreg community
- The window to our communication campaigns

The **Interreg Atlantic Area** has launched its third **#call**, allocating approximately 43 million euros to support transnational cooperation projects. Key themes of this call include:

- 💧 Blue innovation and competitiveness.
- 💧 Blue/green environment.
- 💧 Blue sustainable and social tourism and culture.

The call is open from November 25th to February 14th.

This is an opportunity for organisations to collaborate on solutions to shared challenges that go beyond borders, building stronger and more resilient regions.

Find more details here: <https://lnkd.in/d33xM24V>

☀️ Ahoi, future applicants! ☀️

Starting from 10 March 2025, you can begin preparing your applications for all themes for the Fifth Call for Project Proposals on Jems. 🌈 And remember to book a project idea consultation which will help you build a strong application!

💰 Funding available: €35 million ERDF

Learn more and start your application today!
