Outlines

The programming period 2021 - 2027 has brought new challenges and opportunities for regions to extend beyond borders, reflecting the contemporary pressing needs for better synergy and cooperation between regions and funding programmes. This is reflected as well in the Investments for Jobs and Growth goal, requiring member states to include cooperation actions in each specific objective, thus expanding the range of required collaboration (Reg. EU No. 2021/1060 Art. 22 3 d) vi).

Traditionally, there has been a desire for cooperation beyond borders, but at the same time turning such ideas into real results has never been an easy path. The implementation of cooperation actions projects requires a lot of partnership effort, but also knowledge and exchange of good practices in the EU context. Oftentimes stakeholders are locked on the partnership they currently operate and lack possibilities to exchange with others, which might become the missing key for the success of their cooperation actions.

Objectives

We are reuniting to present and discuss which are the main ingredients for the successful cooperation actions recipe. It is a complex and multi-level topic, so it is important to spend some time discussing the persisting barriers and share practical solutions to overcome them. It is also important to share good practices of programmes which have already launched their cooperation actions.

During this two-day workshop, we will share practical capitalisation and communication tools and techniques, with a particular focus on setting up mechanisms for cooperation action support, discussing practical challenges related to cooperation action planning, implementation and partner identification.
