Full Circle: From Lessons Learned to Future Possibilities Circular Economy and Interreg

22 October 2025

Salzburg, Austria

Outline

This workshop, organised by Interact in partnership with the Austrian-Liechtenstein EUSALP Co-Presidency, is part of a series of webinars and events that serve as a recurring platform for the Interreg community to exchange insights on Policy Objectives. It focuses on **circular economy**, the theme of this year's Green Week edition, and a long-standing area of activity for Interreg and of the EUSALP Strategy. It will explore how European territorial cooperation contributes to making the European economy cleaner, more competitive, and more circular, focussing on concrete tools and outputs, drawing from years of Interreg experience under both **Greener Europe** and **Smarter Europe** policy objectives, within and outside the EUSALP territory.

This dynamic workshop will showcase best practices and breakthrough solutions from Interreg programmes throughout Europe, creating a vibrant space for cross-border learning and knowledge exchange. Participants will explore proven strategies, discuss emerging challenges, and forge new partnerships that will accelerate the transition toward an even more effective European circular economy.

Registrations

We welcome registrations from **Interreg programme** and **project** representatives who are working on the topic of **circular economy** and from anybody experienced in and interested in finding out more about circular solutions developed by Interreg, inside and outside the EUSALP territory.

Full Circle: From Lessons Learned to Future Possibilities **Circular Economy and Interreg**

22 October 2025

Salzburg, Austria

Agenda
