Why It's Distinctive

PO5 governance is pushed down to the scale of the territory itself

Governance

- Each functional area runs its own continuous call
- Dedicated selection committee, 3–4x per year
- Decisions made at territory level, not programme level

Stakeholders

- Municipalities, GECT structures, local associations
- Bottom-up: actors who live the cross-border space
- Different profile than the "classic projects" track

Types of Actions

- Soft mobility links, shared public services
- Tourism / heritage valorisation
- Sized to the functional area, not the whole region

Eleven partner authorities letting functional, sub-regional logic — not the national/regional grid — drive where the money and decision-making sit.
