Please note:

This table offers an explanation of the choices in creating a Contact Profile in the Interact IT system. More detailed instructions on creating a Contact Profile can always be found on the 'Stay-up-to-date' page on Interact's website.

We note that no single system can fully reflect the diversity of Interreg (and other cooperation actors) set-ups, and that a degree of interpretation may be required to make the database fit every profile in Interreg.

You can contact on communication[at]Interact.eu if you need support in setting up your profile, or tech.support[at]Interact.eu if you encounter technical difficulties.
