

60 minutes. 1 measure.

16 November 2026, 14.00 CET
Online

Background

- Are you getting ready for the next programming period?
- Would you like to know how other programmes are designing their measures?
- Do you have very little spare time?

If you answered yes to all these questions, this series of events could be for you.

What to expect?

It's very simple. An Interreg programme will present an example of a possible measure. You can ask them questions about it and offer constructive feedback. And it lasts 1 hour.

Yes, it's as simple as that 😊

For the second edition of this event, we will be joined by Máté Szalók who will share examples of possible measures from the South Baltic programme.

Who is it for?

This webinar is open to Interreg colleagues involved in designing their programme's intervention logics for the next programming period, in particular those:

- interested in learning from the approaches of others, and
- willing to give constructive feedback in exchange.

60 minutes. 1 measure.

16 November 2026

Online

14.00 – 14.05

Welcome & Introduction

Interact

14:05 – 14.20

Presentation of example measures
