50/96 Signed License agreements
signed

What is currently in Jems

- Programme setup and call management,
- multi-linguality, translation management
- privilege and user management
- Audit log
- Entire project workflow (incl small project funds) up to Project reporting
- GDPR sensitive data

What is coming in the future

- MA/JS verifications & Payment of Project reports
- Payment claims to EC
- Findings and corrections module similar as eMS
- Common audit sample (drawn as an export)

When are these features needed exactly according to you?

Questions

For those who have experience with eMS, what were the pain points?

Cooperation **works**

All materials will be available on:

Interact connections / Jems community
